EDUCATION

Hack Reactor — Advanced Software Engineering Immersive Program 2020

Cal Poly Pomona — B.S. Biology 2019

PROFESSIONAL EXPERIENCE

Software Engineer — WebConnex · Remote, CA

Sep 2021 – May 2025

- **Frontend framework migration** — modernized a legacy Angular codebase to React using code splitting, dependency audits, and incremental rollout
- **Reusable component architecture** — React component library adopted across billing, mobile, and core product surfaces, driving faster and more consistent UI development
- **Production monitoring & observability** — alerting infrastructure that cut incident detection from hours to minutes; GraphQL and REST endpoint optimization alongside the backend team

Backend Engineer — Sam's Club (Walmart) · Contract · Remote, CA

Jan 2021 – Sep 2021

- **Automated testing & data integrity** — JavaScript/Node.js test suites validating a 10M+ SKU product catalog; internal Next.js tooling that cut support resolution from hours to minutes
- **Site reliability at scale** — owned services through Black Friday and Cyber Monday peak traffic with zero P0 incidents

Software Engineer — Intreecate · Remote, CA

Aug 2020 – Dec 2020

- **Frontend refactoring & performance** — React, Tailwind, and GraphQL with query batching and caching; established the company's first design system to accelerate subsequent UI work

PROJECTS

SideQuest — Chrome extension turning job searching into a game — XP, levels, badges, reward wheel *Jul 2026*

React · TypeScript · Vite · Chrome Manifest V3 · chrome.storage · Vitest

- One-click capture from LinkedIn, Indeed, or ZipRecruiter; all data in chrome.storage with no backend or account; gamification (XP, levels, badges, wheel) derives from a single event log with full unit test coverage

Folio — local-first personal finance dashboard with zero cloud sync or subscriptions

May 2026

Next.js 16 · TypeScript · SQLite · Drizzle ORM · Tailwind · shadcn/ui

- Imports Chase CSVs via Papaparse into a local SQLite database (Drizzle ORM) with zero cloud sync or subscriptions
- Surfaces spending analytics by category and merchant with Recharts, Zustand, SWR, and a Tailwind v4 + shadcn/ui interface

Trava — iOS app turning walks into a living coverage map of every city you explore

May 2026

Swift · SwiftUI · MapKit · CoreLocation · CoreData · Firebase · HealthKit

- Records walked streets in real time via CoreLocation and renders coverage as an interactive MapKit overlay
- Dual persistence with CoreData for offline use and Firebase Firestore for sync, plus HealthKit integration and Nominatim reverse geocoding

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Swift, SQL, HTML5, CSS3

Frontend & Backend: React, Next.js, React Hooks, Tailwind CSS, shadcn/ui, Node.js, Express.js, RESTful APIs, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Drizzle ORM, Firebase

Cloud & DevOps: AWS (S3, EC2), GCP, Docker, Kubernetes, CI/CD

Mobile & Testing: SwiftUI, MapKit, CoreData, HealthKit, Jest, Vitest, TDD, Agile/Scrum, Git, JIRA
