PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years across frontend, backend, and cloud — shipping React, Node.js, and GraphQL applications on AWS and GCP for companies ranging from early-stage startups to Sam's Club's 10M+ product catalog. Track record of modernizing legacy codebases, building reusable component libraries adopted across billing, mobile, and core platforms, and improving production reliability through monitoring and alerting. Strong TDD practitioner with experience in Agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Swift, SQL, HTML5, CSS3

Frontend & Backend: React, Next.js, React Hooks, Angular, Tailwind CSS, shadcn/ui, Node.js, Express.js, RESTful APIs, GraphQL

Databases & Cloud: PostgreSQL, MySQL, MongoDB, SQLite, Drizzle ORM, Firebase, AWS (S3, EC2), GCP, Docker, Kubernetes, CI/CD

Mobile & Other: SwiftUI, MapKit, CoreData, HealthKit, Jest, Enzyme, TDD, Agile/Scrum, Git, JIRA

PROFESSIONAL EXPERIENCE

Software Engineer — WebConnex · Remote, CA *Sep 2021 – May 2025*

- Led migration of legacy Angular codebase to React, modernizing the frontend stack through code splitting, dependency audits, and incremental rollout
- Architected a reusable React component library adopted across billing, mobile, and core product surfaces, accelerating feature development and improving UI consistency
- Implemented monitoring and alerting infrastructure that reduced production incident detection time from hours to minutes; partnered with backend to optimize GraphQL and REST endpoints

Backend Engineer — Sam's Club (Walmart) · Remote, CA *Jun 2020 – Oct 2020*

- Built automated test suites in JavaScript and Node.js ensuring data integrity across a product catalog of 10M+ SKUs; developed an internal Next.js lookup tool that reduced support issue resolution from hours to minutes
- Served as Site Reliability Engineer through Black Friday and Cyber Monday peak traffic with zero P0 incidents on owned services

Software Engineer — Intreecate · Remote, CA *Sep 2018 – Jul 2019*

- Refactored frontend with React, Tailwind, and GraphQL, improving page load performance through query batching and caching; established the company's first design system, accelerating UI development for subsequent features

Program Manager — Level Up · Ho Chi Minh City, VN *May 2025 – Present*

- Mentor university students on career readiness (resume/CV prep, professional English, time management, cross-cultural workplace skills) and creative skills (video editing, photography); design and run events end-to-end — timeline planning, venue coordination, programming, and live emceeing for 100+ participants

PROJECTS

Trava — iOS app turning your walks into a living coverage map of every city you explore *swift, swiftui, mapkit, corelocation, coredata, firebase, healthkit*

- Built native iOS app in Swift/SwiftUI that records walked streets in real time via CoreLocation and renders coverage as an interactive MapKit overlay; dual persistence with CoreData (offline) and Firebase Firestore (sync), HealthKit integration, and Nominatim reverse geocoding

Folio — local-first personal finance dashboard with zero cloud sync or subscriptions *next.js 16, typescript, sqlite, drizzle orm, tailwind, shadcn/ui*

- Built privacy-focused, local-first finance dashboard in Next.js 16 App Router and TypeScript; imports Chase CSVs via papaparse into SQLite/Drizzle ORM with zero cloud sync, surfaces spending analytics by category/merchant with Recharts, Zustand state, SWR data fetching, Tailwind v4 + shadcn/ui

Star-Advisor — Full stack travel booking app built with React, Express, MySQL, and AWS (S3, EC2); TDD with Jest/Enzyme and performance-optimized with lazy loading and CDN caching.

EDUCATION

Hack Reactor — Advanced Software Engineering Immersive Program, 2020 · **Cal Poly Pomona** — B.S. Biology, 2019
